

A WINNING COMBO!

MIPS Value Pathways And PRIME Registry

With the new Optimizing Chronic Disease Management MVP supported by PRIME Registry, you can choose from a menu of pre-selected measures and simplify your MIPS reporting.

FEATURING THE PERSON-CENTERED PRIMARY CARE MEASURE

The Optimizing Chronic Disease Management MVP measures include the Person-Centered Primary Care (PCPCM) PRO Measure, developed as part of the Center for Professionalism & Value in Health Care's Measures That Matter to Primary Care initiative. The PCPCM was chosen by CMS due to its value in capturing the patient voice, and their relationship with their physician, especially when a patient is managing a chronic illness.

PRIME Registry is ready to support your participation in the Optimizing Chronic Disease Management MVP.
